

Panasonic

Wireless playback for 23 hours

High-capacity rechargeable battery

The headphones provide wireless connection via Bluetooth. Listening to music is much more convenient without annoying wires. In addition, the headphones can be used as a headset with a microphone for mobile devices. The rechargeable battery provides 3 hours of music playback after a 15-minute quick charge and 23 hours of continuous playback when the battery is fully charged.

Deep, rich bass

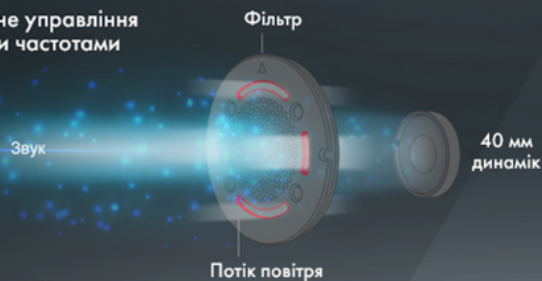

XBASS
Система додаткового баса

Additional bass system (X-BASS) with original acoustic structure and acoustic tuning contour

Ready for powerful sound? Overhead cups with 40 mm dynamic heads and a neodymium magnet will not disappoint you. The system of additional bass (X-BASS) in combination with the acoustic control of low frequencies ensures the passage of air flow through the filter and circuit of the acoustic adjustment for improved reproduction of the low frequency range. Headphones reproduce clear and rich bass with a reduced level of distortion.

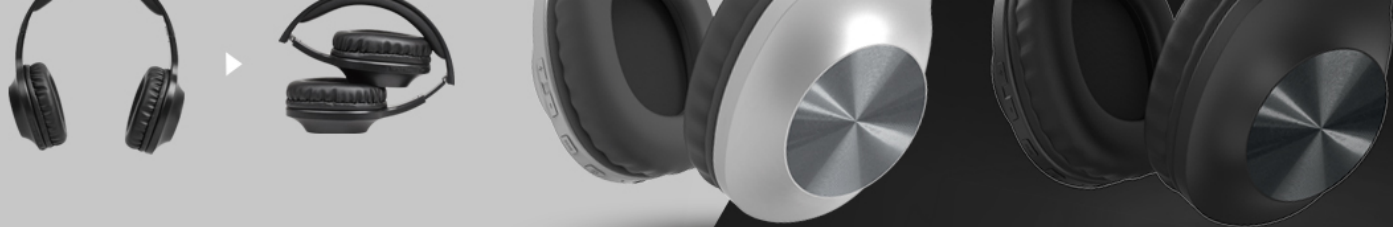

Акустичне управління низькими частотами

Sophisticated design and ease of use and portability

Headphones with a folding design and calm colors exactly correspond to the latest trends, which makes them an ideal accessory that can emphasize individual style.

Wireless playback for 24 hours

Compatible with Bluetooth®

Deep, saturated low frequencies
